

NATTASIT JANWISET

Software Developer

Bangkok Thailand | nattasit.work@gmail.com | <https://cv.nprojectx.com>

EDUCATION:

CHANDRAKASEM RAJABHAT
UNIVERSITY

2017 - 2021

Bachelor of Science in Computer Science

SKILLS:

- **Frameworks & Languages:** PHP (Laravel), C# (.NET Core/Framework)
- **Databases:** SQL Server, MySQL, Oracle
- **DevOps & Tools:** Docker, Git (GitLab) CI Pipeline
- **Data & Automation:** Database Migration, n8n Workflow
- **Core Skills:** Advanced Debugging, Problem-solving
- **Reporting:** Crystal Reports, Jasper Report

CERTIFICATIONS:

- **Advanced AI Engineering for IT & Developer Teams**
IRIS Consulting | 2026
- **Architecting on AWS**
ERT Training Center | 2026

LANGUAGE:

- Thai
- English

SUMMARY:

Software Developer with 5+ years of experience in advanced troubleshooting and complex system logic. Proven background in managing environments with Docker/WSL, automated backups, and enterprise reporting. Dedicated to delivering reliable solutions using Cloud and AI.

EXPERIENCE:

SOFTWARE DEVELOPER **2023 - PRESENT**

Bangkok Expressway and Metro PCL

- Developed secure, standardized public APIs with end-to-end encryption for external partner integrations.
- Built an end-to-end dispatch web app for couriers, streamlining workflows from job assignment to proof-of-delivery (e-POD) sign-off.
- Engineered automated CI/CD pipelines and applied OWASP standards to detect and patch system vulnerabilities.
- Designed scalable backend architectures optimized for high-concurrency workloads and large active user bases.
- Executed secure database migrations across servers, ensuring zero data loss and minimal system downtime.
- Automated enterprise workflows using n8n, substantially reducing manual processing time and boosting team efficiency.

PHP DEVELOPER **2021 - 2023**

101 GLOBAL Co., Ltd.

- Developed core modules for the OTOP Big Data web platform using PHP and MySQL, including secure user authentication, dynamic training content, and administrative summary reporting.
- Conducted hands-on technical training sessions for district officers across Thailand to drive seamless nationwide system adoption.
- Built a web-based loan risk assessment system for Government Savings Bank (GSB) with PHP and Oracle, enabling multi-factor risk calculations and custom reporting outputs.
